UCC ICT Summer Camps 2025

Summer Coding & Technology Camps Organised by the School of Computer Science & Information Technology, UCC

The UCC ICT Summer Camps offer an excellent opportunity for students to develop their digital skills through fun, hands-on modules. These in-person camps are designed for both secondary school and senior primary school students, with tailored programmes to suit each age group. While no prior experience is required, an interest in computers and maths is encouraged.

Please note: Each camp is carefully designed for a specific age group, and we ask that participants register only for camps appropriate to their age. For any questions, please contact DoIT4Real@cs.ucc.ie.
